

# Dr. Rick Goodman's A/V Requirements

## **SOUND**

Lavaliere microphone – wireless or with a long (at least 50 foot) cord. It is preferred that this is not the same microphone that the introducer will be using.

## **STAGING**

A riser/stage approximately 8'x12' or larger as close to the audience as possible. A lectern is not needed. If a lectern is being used for other presentations, please position it at least four feet from the front edge of the "stage." Rick will work in front of the lectern.

Lighting is important. Please make sure Rick has a well lit "performance area." Most meeting rooms (and their existing lighting) are fine, but when Rick does after-dinner programs the lights must be full and bright. (Rick's programs are not intended for low light /romantic – settings.)
